

Our Wind Co-op: Turbine #5

Liberty County, Montana

Installed December 2003

County Commissioner Don Marble has been “the wind in the sails” of the Liberty 10 kW community wind project.

“The generator made everyone around here aware of what energy use is all about. It was the realization of what we were not doing to save energy that was the real surprise to us.”

“I didn’t realize the way it would change the way people think around here as much as it has.

Community folks come up to me and say ‘I look up at the turbine every day and see the turbine turning and it just makes me feel good’ and that indicates how much of a success story this is.”
